

Same Same Advanced

Score: /10

Imagine you put a hand in each jar at the same time, mix the gumballs up, then you pull out 1 gumball in each hand.

What is the chance of getting the same colour/color in each hand?

R = red, G = green, B = blue & Y = yellow.

Write your answer, as a fraction, underneath each example.

Use a spare sheet of paper for your calculations and hand the sheet in as well.

(These examples are from the game.)
